OBJECTIVE

Information Science and Engineering undergraduate (2023–2027) seeking Machine Learning / AI internship roles. Strong foundation in Python, SQL, R, and data analysis with hands-on projects and applied AI experience. Passionate about building real-world AI solutions, leveraging generative AI tools, and contributing to impactful, data-driven systems.

EDUCATION

B.E., Information Science and Engineering – NMIT, Bengaluru	2023–2027	CGPA: 7.95
Pre-University (PU) – Siddaganga PU College	2020–2022	Score: 95%
Class X (CBSE)	2020	Score: 91.2%

SKILLS

Programming: Python, C, SQL, R
Machine Learning: Pandas, NumPy, Scikit-learn, NLP, EDA, TF-IDF, Random Forest
AI & Analytics: Generative AI, Workflow Automation (LinkedIn/YouTube Pipelines), Content Optimization, Data-Driven Decision-Making
Tools: Power BI, Google Colab, Lovable, GitHub, Jupyter Notebook, Emergent, Manus, N8N, Canva, Antigravity
Soft Skills: Leadership, Communication, Collaboration

PROJECTS

SacchAI – Interview Integrity & AI-Assistance Detection Platform

- Built a browser extension for real-time detection of unauthorized AI assistance during online interviews, monitoring behavioral signals, clipboard activity, tab-switching, and speech/response patterns.
- Developed a custom ensemble ML model for authenticity classification and risk scoring; generated recruiter-facing reports with genuineness scores, suspicious activity flags, and plagiarism analysis with 88.4 percent accuracy.
- Tech: JavaScript, TypeScript, React, Chrome Extension APIs, Python, Scikit-learn, Node.js, REST APIs*

MediConnect – Full-Stack Healthcare Operating System

- Built a full-stack HealthcareOS with multi-hospital management, role-based access, appointment scheduling, digital prescriptions, inter-department referrals, pharmacy inventory, and AI-assisted patient support.
- Implemented automated follow-ups, shared medical memory, family account management, and secure file storage via Supabase RLS with Playwright testing and TypeScript validation.
- Tech: React, TypeScript, Tailwind CSS, Supabase, Google Calendar API*

JobShield – AI-Powered Fake Job Advertisement Detection

Final Year Project

- Designed a multi-stage fraud detection platform using NLP and ML to analyze job postings for fraudulent patterns; performed multi-level recruiter verification via email domains, WHOIS data, and company websites.
- Generated fraud risk scores with explainable verdicts: Likely Genuine, Suspicious, or High Scam Risk.
- Tech: Python, Scikit-learn, spaCy, BeautifulSoup, WHOIS, Pandas, TF-IDF, Random Forest*

EXPERIENCE

Founder and Event Lead – Adwaita Club, NMIT 2023–2025
Established 2 institutional MOUs and conducted college-level health camps; volunteered at an AI Summit in collaboration with Rabbitt AI. Organized 5 guest events with end-to-end execution and financial management; mentored students toward successful placements.

Digital Marketing Intern – LinkedInforHER, Bengaluru 2023–2024
Created and published professional content across digital platforms; built automated LinkedIn and YouTube content-posting pipelines using AI-driven workflow tools (N8N, Antigravity) to improve reach and engagement.

CERTIFICATIONS

- [Machine Learning Specialization](#) (Coursera) | [Generative AI Track](#) (Credly) | [Power BI Essentials](#) (Simplilearn)

ACTIVITIES AND ACHIEVEMENTS

- Achieved 1M+ impressions on LinkedIn; ranked among top 0.095% users globally in 2024 (Cleve AI).
- Built and deployed content automation pipelines for LinkedIn and YouTube using AI-driven workflow tools.
- Volunteered in Book Donation Drive under BooksforHer initiative at IIMB and Saanidhya, Mangalore.
- Secured 3rd place in the college-level Thinkathon event (competitive ideation and problem-solving challenge).
- Conducted a career guidance and industry-readiness program for ISE department students at NMIT.
- Won 5 college-level cricket tournaments.
